

How to make hot chocolate

CHOOSE MILK AMOUNT

125 ml

thick hot chocolate

200 ml

semi-thick hot chocolate

300 ml

cocoa drink

1

Measure the amount of milk depending on how thick you want your drink.

2

Pour the milk into a saucepan and add 1 sachet of hot chocolate powder.

3

Heat while stirring constantly until the drink thickens.

4

Pour the hot chocolate into a cup and decorate with the topping mix.

Heating

Heat the drink over medium heat, stirring constantly to prevent it from burning or boiling over.

Topping mix

The topping mix stays on top of thick and semi-thick hot chocolate. For a cocoa drink, only the marsh-mallows stay on top; the rest of the topping mix sinks to the bottom.
